

Why Use VIPRE With Office 365?

More than Features—a Fully Managed Service

Office 365 is a popular cloud solution for email service, and when bundled with email security from VIPRE offers the perfect combination for your business. Office 365 is known to alleviate some on-premise issues, yet as a standalone product, it requires extensive management, setup and configuration by the IT Manager.

Fortunately, by adding VIPRE to Office 365, you receive a fully managed and feature-rich email security solution supported by 24/7 technical support. Both monitored and maintained round-the-clock, VIPRE is a secure, effective and hassle-free service. It is underpinned by multiple datacenters, making it highly resilient, scalable, and supported by our guaranteed service level agreements—99.999% availability, 99% spam protection and 100% protection from known viruses.

Gain Better Uptime with Multiple Providers

Vendor consolidation can offer a number of advantages; however, purchasing all your email services from a single source can also create problems. For example, an outage by a single provider could seriously hinder your business's ability to function. Fortunately, with VIPRE's email continuity feature, an onsite outage is never an issue. VIPRE email continuity provides you with continued access to emails when your email service fails or an unforeseen event disables the ability to send and receive emails through the normal gateway channels. You will still have the ability to receive and reply to emails from a browser-based login anywhere in the world.

“May I just congratulate you and your team for the excellent level of service you provide. Over the number of years we have dealt with you, every question has been responded to in a timely and professional manner. It is an absolute pleasure to deal with a supplier who treats us in the same way we endeavour to treat our clients.”

Delta Financial Systems

“VIPRE made migrating our customers a complete success. Their expertise, knowledge and insight into the issues we had been experiencing confirmed it was the right choice from day one to use VIPRE. Our support issues have since disappeared and we've even increased our monthly revenue using VIPRE's excellent suite of services!”

Unparalleled Support and Additional Features —at No Extra Cost

Despite a large suite of products in place and a customer base across the globe, Microsoft is in a tough position when it comes to providing live phone support. In addition, when contacting support for help there is no guarantee that you will reach an expert in your particular area of concern. Fortunately, as a highly focused security vendor, VIPRE offers experts in email security and are available 24/7 to assist you. From troubleshooting, to system training and product optimization, our support services are offered free of charge to make sure you get the best out of the products you've chosen.

In addition, at no extra cost, VIPRE offers a proprietary advanced policy engine, which offers you configurable policy enforcement rules. Now you can ensure your users are sending and receiving emails in accordance with your company's internal policies. You can prevent users from accessing inappropriate content, stop data leaks, and protect private data from ending up in the wrong hands.

Protect Your Business with Tamperproof Archiving

With Office 365, retention policies can't guarantee retention of every message. Your data preservation is at risk as users have the ability to delete emails from both their inbox and personal archive. In addition, mail and attachments are only archived for 30 days unless put on limited legal hold.

Fortunately, VIPRE offers your business an optional tamperproof archiving system that captures emails at the gateway level. Everything is stored, indexed and retrievable—with no exceptions. With VIPRE archiving in place, you can protect your business from lost or deleted messages and minimize regulatory compliance costs.

Comprehensive Email Solutions and Support—at No Extra Cost

With VIPRE, you'll receive an array of additional email solutions and unparalleled support, including:

- ✓ Data leak prevention
- ✓ Large file send capability
- ✓ 90-day email replay
- ✓ 90-day quarantine
- ✓ 90-day logging
- ✓ HTML disclaimers
- ✓ Email encryption
- ✓ Inbound/outbound spam and malware protection
- ✓ Enhanced message routing to facilitate migrations
- ✓ Technical support for hybrid deployment scenarios
- ✓ Large file receive capability

“The support from VIPRE has been very good. They are on top of new products and features, quickly incorporating them into their service.”
