

## Manage more clients more efficiently

**VIPRE Site Manager empowers managed service providers (MSPs) to manage clients from a single portal**

VIPRE Site Manager provides MSPs a full-featured endpoint security solution with a centralized multi-tenant management portal for visibility across an entire client-base. Protect endpoints across Windows, macOS, Linux, Android, and Chromebook devices from a single console. Site Manager protects at the file, application and network layer, combining multiple layers of security with network-and application-agnostic DNS protection at no additional cost.

### Increase efficiencies and reduce overhead costs

Client level reporting helps deliver greater value to your customers. Save time and reduce impact on resources with automated processes and malware determinations. Stay organized with simple monthly utility billing with provider usage reports. Demonstrate service value by delivering regular threat report summaries to clients.

**VIPRE Site Manager delivers:**

### Increased Profitability

- Multi-OS endpoint coverage: Windows, macOS, Linux, Android, and Chromebook
- Centralized multi-tenant management
- Detailed client level efficacy reporting
- Global visibility with interactive threat dashboard
- Increase revenue from multiple billable services

### Scalable Security Packages

Seamlessly provision three tiers of protection from a single multi-tenant portal.

### VIPRE Endpoint Security Cloud

- High-efficacy Next-Gen AV with behavioral analysis
- Agnostic DNS-layer defense and URL blocking
- Integrated Web Access Control and internet usage policies

### VIPRE Endpoint Detection & Response (EDR)

- Deep forensic visibility into process and user activity
- Advanced threat hunting across Windows, macOS, and Linux
- Correlated attack chain visualization for rapid investigation

### VIPRE Endpoint MDR

- 24/7 SOC-as-a-Service with expert monitoring
- Human-led threat hunting and guided remediation
- High-margin revenue without the headcount overhead

## THE SITE MANAGER DASHBOARD

*Easily view and act upon threat data for all of your clients from a single dashboard.*

## VIPRE Site Manager Partner Testimonials

**“** I like that VIPRE Site Manager doesn't make a lot of unnecessary noise. It's straight forward and alerts me when I need it. The site manager makes it easy to separate out my customers which makes administration easier and quicker.”

**Chuck Flagg**

President and CEO  
Orion Technologies

**“** VIPRE Site Manager is easy to use and doesn't require a lot of technical training to get up and running. The UI is clean and the ability to drill down and quarantine on my cell phone is amazing.”

**Robert Siemons**

CEO  
Rain Networks
