VIPRE Endpoint EDR+MDR

DATASHEET

Simple, Sophisticated Endpoint Threat Management

VIPRE Security Group understands that many of today's EDR solutions are way too complex for the average business without a large, experienced IT staff. That's why VIPRE Endpoint EDR+MDR is easy to use and is backed by a highly experienced MDR team - keeping organizations protected yet not overwhelmed with alert fatigue. Protect your entire endpoint estate across Windows, macOS, Linux, Android, and Chromebook devices from a single console

VIPRE Endpoint EDR+MDR is designed for small-to-mid-sized enterprises and the security professionals who serve them. Providing the tools and support you need at the time you need them to better protect your organization across diverse device environments, EDR+MDR delivers better threat detection and better incident response than comparable solutions. EDR+MDR turns threats into intelligence and takes action to thwart attacks, because simply identifying a threat is not enough.

- **Multi-Platform Coverage** - Manage endpoint security across Windows, macOS, Linux, Android, and Chromebook devices from one unified platform.
- **Endpoint Detection & Response** - A hybrid next-gen antivirus and EDR solution that works across Windows, macOS, and Linux endpoints, the solution constantly scans files, processes, and network activity for malicious activity and content and instantly alerts you to suspicious behaviors, correlated across all activity. At the top of the charts in independent testing, the EDR component is extremely effective at detection.
- **Threat Containment** - Prevent threat spread by quickly isolating affected devices and malicious content on the network.
- **Attack Analysis** - Depend on a team who can boast of a combined 200+ years of IT forensics experience and dozens of security certifications, who leverage the efficient EDR solution to analyze attacks and the malicious content associated with those attacks.
- **Managed Response** - The VIPRE MDR team will take action to further contain and remediate attacks, cleaning up all traces. Your team will receive a full report for analysis and follow-up, as well as proactive security hardening recommendations.
- **Powerful Extra Features**- Vulnerability scanning and patch management, DNS protection, Remote Browser Isolation, Removable Device Control, and policy-based Web Access Control are all included at no additional cost to give you more control and to help you harden your environment against future attacks.

VIPRE EDR+MDR Benefits

EDR Built for Speed and Efficiency
Why pay extra to have a services team chasing false positives, or let your endpoint solution slow you down - EDR+MDR comes with the winning combination of accurate detection, low system impact, and intuitive usability to reduce wasted hours.

Complete Estate Protection: From Mobile to Servers
Protect endpoints across Windows, macOS, Linux, Android, and Chromebook environments from a single console. Eliminate security gaps caused by inconsistent protection across different device types, ensuring comprehensive visibility and control over your entire endpoint estate.

Advanced Ransomware Scanning & Prevention
VIPRE's Advanced Active Protection uses real-time behavior monitoring and artificial intelligence coupled with one of the world's largest threat intelligence clouds to help detect, block, and automatically roll back ransomware.

Unified Endpoint Protection, Next-gen Antivirus, EDR, and MDR in a Single Solution
Why settle for sub-par separate NGAV, EPP, EDR, and MDR when you can have one unified solution that protects your entire device estate regardless of operating system, doesn't let threats fall through the cracks, and won't spam you with false alarms.

Rapid Investigation, Containment, and Response
The VIPRE MDR team leverages superior threat visualization and our AI Advisor to accelerate investigation, threat quarantining, device isolation, and our Remote Shell to enable rapid containment and remediation of spreading threats.

Stay Informed
Although the VIPRE MDR team will take care of threats for you, complete reporting and further hardening recommendations will always be provided to you.

Proactively Secure Your Systems
Built-in vulnerability assessment and patch management help you proactively secure and harden your environment.

Why Choose VIPRE?

VIPRE Security Group puts over twenty years of advanced security intelligence, cutting-edge machine learning, real-time behavioral analysis, and a comprehensive threat intelligence network to work defending against known and unknown attacks. The VIPRE MDR team complements this extensive solution experience with expert protection services.

The Best Protection at the Best Price
VIPRE is consistently ranked in the top tier alongside other market leaders in comprehensive independent tests.

Easy to Use
VIPRE's intuitive solutions make it easier to secure your endpoints from ransomware, APTs, and other threats.

Rapid Deployment
Admins can deploy VIPRE quickly with minimal disruption to day-to-day activities.

Reduced Downtime
VIPRE enables both speed and security protecting you from malware without slowing down any processes.

Award-winning Support
Included with all of our solutions is access to our award-winning, highly-qualified global tech support team with a consistent 90%+ CSAT rating.

About VIPRE

VIPRE is a leading provider of internet security solutions purpose-built to protect businesses, solution providers, and home users from costly and malicious cyber threats.

Our award-winning software portfolio includes comprehensive endpoint, email and web security, plus threat intelligence for real-time malware analysis, delivering unmatched protection against today's most aggressive online threats.
