

SafeSend

SafeSend is a single solution designed to prevent data loss caused by human error in outbound email. It is available in two deployment options: Cloud and Self-Hosted. Both deliver the same core protection capabilities, including recipient verification, attachment checks, and integrated DLP controls.

The difference lies in how SafeSend is deployed and managed. Your choice depends on your infrastructure strategy, compliance requirements, and available IT resources, not the level of protection.

Use the table below to compare each option side by side and identify the deployment model that best fits how your company operates.

SafeSend Cloud

Best for

Best suited for organizations of all sizes, from small businesses to enterprises, that want robust protection without the burden of managing the infrastructure themselves.

Benefits

- ✓ Fast deployment with same-day setup
- ✓ Dedicated onboarding and deployment with VIPRE support
- ✓ Hands-off maintenance through automatic feature releases and security updates managed by VIPRE
- ✓ Data processed in VIPRE's ISO-certified cloud infrastructure
- ✓ Automatic scaling to support your organization's growth
- ✓ Multi-Tenant Environment: Your organization's information remains private to your environment only
- ✓ Regional Hosting

SafeSend Self-Hosted

Best for

Best suited for enterprises, government agencies, and organizations in industries such as legal, healthcare, and finance that require dedicated infrastructure, strict data sovereignty, and internal IT management.

Benefits

- ✓ Maintain full control over data sovereignty and compliance
- ✓ Keep all email data and traffic within your own infrastructure
- ✓ For both legacy (older versions of Outlook) and modern Microsoft environments (Microsoft 365)
- ✓ Integrates with Active Directory, domain controllers, group policy, on-premise Exchange, Entra ID, and Exchange Online hybrid deployments
- ✓ Maintain full control over clustering, failover, and disaster recovery configuration

SafeSend Cloud

Specs

Infrastructure	Fully VIPRE hosted
