

Complete Security for Schools

Schools face unique cybersecurity challenges: tight budgets, stretched IT teams, compliance obligations, and a mix of on-campus and remote devices.

VIPRE for Education delivers complete protection. From infrastructure security to cybersecurity training for students and staff. And it's purpose-built and priced for education.

Security Awareness Training for All Ages

Technology protects systems, while training protects people. VIPRE for Education is the only security partner that trains both students and staff.

VIPRE Security Training for Students prepares learners aged 5–18 with age-appropriate, scenario-based modules covering phishing, password protection, social media safety, and online threats. Students become smart digital defenders, building practical skills they use at school and home.

Inspired eLearning Security Awareness Training equips educators, administrators, and staff with engaging content and realistic phishing simulations. Build your security culture and strengthen your human firewall.

Built for Education's Unique Needs

- Budget-conscious pricing and flexible licensing
- Cloud-based management designed for limited IT resources
- COPPA and FERPA compliance support and duty-of-care alignment
- Straightforward deployment with centralized visibility
- Support for on-campus and remote devices

Comprehensive Infrastructure Protection

VIPRE's integrated security suite delivers layered protection across your environment.

VIPRE EDR: AI-driven detection, real-time behavior monitoring, and ransomware protection secure every device—on campus or remote—without slowing users or overwhelming IT.

VIPRE MDR: A fully managed service for security incidents generated by VIPRE EDR, solves many of the challenges associated with deploying an EDR solution, especially for schools with small IT staff.

VIPRE Email Security uses inbound, outbound and internal filtering to protect against viruses, malware, spam and social engineering (BEC) attacks using advanced AI technologies. Ensuring complete protection.

VIPRE SafeSend prevents misaddressed emails and data leakage with recipient confirmation, attachment scanning, and customizable DLP rules tailored to your institution.

VIPRE Threat Analyzer & ThreatIQ use AI-driven analytics to uncover malicious behavior, analyze threat data, and deliver actionable intelligence. Detect tomorrow's threats before they cause harm.

VIPRE Penetration Testing offers internal, external, and wireless penetration testing to identify vulnerabilities in access controls, privilege escalation, and network security. Our experts provide insights to enhance organizational security.

Enterprise-grade security | Education-friendly pricing | Purpose-built for schools

You Don't Need a Huge Security Team. You Need the Right Partner.

VIPRE for Education delivers comprehensive protection—from endpoints to email to students themselves—so you can focus on education, not incident response.
